

## SIDING/CLADDING RIBBED PANEL

### Technical details

Architectural/Structural panel

Total Width	1150mm (45.27in)
Effective Width	1100mm (43.30in)
Rib/Step Height	20mm (0.78in)
Minimum Length	75.50cm (29.7in)
Maximum Length	24'+(Limited with delivery)
Materials	Steel - Zinc coating [g / m <sup>2</sup> ] - min. 275
Finishes	Matte/Crinkle Look

### General information

Cladding ribbed panel is our strongest and most versatile panel, formed with G 90- 25 Gauge steel. This exposed fastening panel with its 11/4" rib adds a bold charm to any project along with quick and easy installation. Ideal choice for both exterior and interior wall applications. It provides rigidity to any structure and is completely weatherproof. Aside from being widely used in industrial, commercial, and agricultural sectors, it is getting popular for the residential sector as well.

### characteristics

Stellar wall cladding panels are versatile product, that can be installed both horizontally and vertically.

Ample vertical ribbing provides rigidity & reinforces the whole building structure in general.

Suitable and a natural choice for light industrial & agricultural applications Practical uses include, interior and exterior garage walls, boathouses, storage sheds, barns, and increasingly residential homes.

### Advantages

- Fast wall coverage, low or no wastage.
- Great alternative to conventional vinyl siding.
- PVDF paint finish, available in 8 colors
- Custom-cut full - length sheets - up to 30 feet
- Exceptional rigidity, low cost per sq. ft.
- Water siphon off -channel system.

### Dimensions, longitudinal section.
